

A gentle introduction to Bayesian Statistics (Course code S18)

21 – 25 July 2025

Course Director: Sara van Erp

E-mail: ms.summerschool@uu.nl

Day	Time	Type	Description	Location
Monday	09:00 – 12:00	Lecture	Conceptual introduction + reasons for using Bayesian methods + discussion on the interpretability of results when using p-values/95%intervals + empirical example of a linear regression analysis in the Bayesian framework. <i>Useful reference:</i> van de Schoot, R., Depaoli, S., King, R. et al. Bayesian statistics and modelling. <i>Nature Review Methods Primers</i> 1, 1 (2021). https://doi.org/10.1038/s43586-020-00001-2	Koningsberger building room COSMOS
	12:00 – 13:00	Lunch		Educatorium
	13:00 – 16:00	Computer lab	Work on exercises and ask questions.	Koningsberger building room COSMOS

Day	Time	Type	Description	Location
Tuesday	09:00 – 12:00	Lecture	Q&A + WAMBS-checklist (when to worry and how to avoid the misuse of Bayesian Statistics) <i>Useful references:</i> Depaoli, S., & Van de Schoot, R. (2017). Improving transparency and replication in Bayesian statistics: The WAMBS-Checklist. <i>Psychological methods</i> , 22(2), 240. Van de Schoot, R., Veen, D., Smeets, L., Winter, S. D., & Depaoli, S. (2020). A tutorial on using the WAMBS checklist to avoid the misuse of Bayesian statistics. <i>Small Sample Size Solutions: A Guide for Applied Researchers and Practitioners</i> ; van de Schoot, R., Miočević, M., Eds, 30-49.	Koningsberger building room COSMOS
	12:00 – 13:00	Lunch		Educatorium
	13:00 – 16:00	Computer lab	Work on exercises and ask questions	Koningsberger building room COSMOS

Day	Time	Type	Description	Location
Wednesday	09:00 – 12:00	Lecture	<p>Today, we discuss estimation methods including alternatives that can be more efficient when dealing with computational or non-convergence issues. A brief introduction to and the benefits of these estimation methods (MCMC, Gibbs, MH, HMC, NUTS, etc.) will be reviewed. These insights can help to understand differences between software that can be used. Today may be a little more technical (less gentle) but without equations.</p> <p>Useful references: https://chi-feng.github.io/mcmc-demo/ Jonah Gabry, Daniel Simpson, Aki Vehtari, Michael Betancourt, Andrew Gelman, <i>Visualization in Bayesian Workflow</i>, <i>Journal of the Royal Statistical Society Series A: Statistics in Society</i>, Volume 182, Issue 2, February 2019, Pages 389–402, https://doi.org/10.1111/rssa.12378</p>	Koningsberger building room COSMOS
	12:00 – 13:00	Lunch		Educatorium
	13:00 – 16:00	Computer lab	Work on exercises and ask questions.	Koningsberger building room COSMOS

Day	Time	Type	Description	Location
Thursday	09:00 – 12:00	Lecture	<p>Today we will discuss the importance of prior sensitivity analysis to investigate the influence the prior has on the results. We will focus on models with many parameters to estimate, possibly too many for the model to be identified in a classical sense. We discuss the use of shrinkage priors to estimate these models and select substantial parameters.</p> <p>Useful references: van Erp, S. (2020). A tutorial on Bayesian penalized regression with shrinkage priors for small sample sizes. <i>Small sample size solutions</i>, 71-84. https://library.open.org/bitstream/handle/20.500.12657/22385/9780367221898_text%20(1).pdf?sequence=1#page=85</p>	Koningsberger building room COSMOS
	12:00 – 13:00	Lunch		Educatorium
	13:00 – 16:00	Computer lab	Work on exercises and ask questions.	Koningsberger building room COSMOS

Day	Time	Type	Description	Location
Friday	09:00 – 12:00	Lecture	<p>Today we elaborate on ways in which informative priors can be specified. We discuss how we can use expert knowledge and previous studies to inform these decisions. We also provide case studies and end with general reflections.</p> <p><i>Useful references:</i> <i>van de Schoot R, Veen D, Grandfield EM, et al . (2021) The Use of Questionable Research Practices to Survive in Academia Examined With Expert Elicitation, Prior-Data Conflicts, Bayes Factors for Replication Effects, and the Bayes Truth Serum. Front Psychol. doi: 10.3389/fpsyg.2021.621547.</i></p> <p><i>Veen, D., Stoel, D., Zondervan-Zwijnenburg, M., & Van de Schoot, R. (2017). Proposal for a five-step method to elicit expert judgment. Frontiers in psychology, 8, 2110. https://doi.org/10.3389/fpsyg.2017.02110.</i></p>	Koningsberger building room COSMOS
	12:00 – 13:00	Lunch		Educatorium
	13:00 – 16:00	Computer lab	<p>This afternoon there will be the opportunity to analyze your own data with the methods discussed during the course and ask questions. If you do not have suitable data to bring, we will provide you with a data set and research questions to practice.</p>	Koningsberger building room COSMOS
